

The 3 Branches of our Government

Create a PowerPoint of at least 8 slides but no more than 10 slides about the 3 branches of our government. The PowerPoint should include the following:

Introduction slide with title and your name.

Two slides for each branch

Slide 1 - qualifications for that position

Slide 2 - at least 5 things that branch does

The final slide should be a list of sources consulted in creating the PowerPoint. This includes your textbook and any websites you use.

Use no more than 1 graphic per page and be sure to put where you got the graphic from the list of sources. Use no distracting transitions.

Save the file in your home directory. When finished, call the teacher over for them to check your work. Should you finish before your classmates, a list of websites with geography and civics games can be found for you to play while they finish.
